

<u>CK 46A</u>	ELECTRICALLY HEATED FUEL TANK VENTS	20 June 1966	
To provide safety feature of prevention of ice formation over fuel tank vents; operates automatically when pitot heat is used. Models 560A, 560E and 680.			
<u>CK 50</u>	RUDDER PEDAL AND CONTROL COLUMN BOOT KIT INSTALL	17 December 2013	
columnBoots	placement parts and instructions for the installation of rudder pedal and control for aircraft pressurized to the floor. Models (All) 680, 680FL, 680FL(P), 680F( 81, 685, 690, 690A/B/C, 695	Р),	
<u>CK 68B</u>	ELECTRIC WINDSHIELD WIPER	24 February 1975	
To provide in	nproved visibility for Models 500S, 560E, 560F, 680E, 680F, 680T and 681.		
<u>CK 73</u>	BAGGAGE COMPARTMENT EXTENSION	27 November 1963	
	increases baggage compartment space to 48 cubic feet / 350 pounds for Models 560F, 680E and 680F.		
<u>CK 81B</u>	WING LOWER SPAR CAP REINFORCEMENT KIT	17 March 65	
Modification to add reinforcing straps to the lower spar cap between wing stations 38.00 left and right. Models 500, 500A, 500B, 520, 560, 560A, 560E, 560F, 680, 680E, 680FL, 680FL(P), 720, RL26C, RL26D.			
<u>CK 82A</u>	WING ICE INSPECTION LIGHT INSTALLATION	27 March 1967	
Provides night flying safety feature by illuminating wing leading edge. Models 500A, 500B, 500S, 500U, 560F, 680F, 680FL, 680FL(P), 680F(P), 680T, 680V, 680W, and 681.			
<u>CK 87A</u>	NON-SIPHONING FUEL FILLER CAP	10 September 1973	
Easily installed kit, cap interchangeable with present cap. Fuel tank remains sealed even if cap is not secure. Models 500, 500A, 500B, 500S, 500U, 520, 560, 560A, 560E, 560F, 680, 680F, 680FL, 680FL(P), 680F(P),			
<u>CK 94</u>	ALTERNATE STATIC PRESSURE SOURCE	28 February 1967	
Provides added safety feature of alternate static source for flight instruments for all prop driven Models except 520, 560, 720.			
<u>CK 97</u>	IMPROVED HEATED STALL WARNING SWITCH INSTALLATION Rev 1 dated 24 Nov 1967	10 June 1967	
Modification approved for 'All-Weather' flight conditions with new visual speed control indicator and 'Tellite' switch installations for Models 500A, 500B, 500U, 560F, 680F, 680FL, 680FL(P), 680F(P), 680T.			
<u>CK 105</u>	IMPROVED PROPELLER ELECTRICAL DEICER SYSTEM Rev 1 Rev 2 dated 12 December 1972	11 June 68	
Modification features convenient single-switch control for Models 500S, 500U, 560F, 680F, 680FL, 680FL(P), 680F(P).			
TWIN COMMANDER AIRCRAFT LLC • 1176 Telecom Drive • Creedmoor, NC 27522			

Telephone: 919-956-4300 • Fax: 919-682-3786 • www.twincommander.com

<u>CK 109A</u> Modification fe	<u>100-AMPERE ALTERNATOR INSTALLATION</u> Rev 1 Oct 13 1972 eatures lower engine RPM charging capabilities, improved system reliability,	15 February 1971
and sufficient a	amperage output to assume additional electrical loads that may be imposed on Models 500B, 500S, 500U.	
<u>CK 110</u>	FUEL LOW LEVEL WARNING SYSTEM	1 April 1970
Provides a fuel 680W, 681.	low level warning system for the earlier Commander Models except 680T, 680V	,
<u>CK 111</u>	IMPROVED CABIN DOOR SEAL	14 August 1970
	rovides an improved cabin door seal assembly that allows a more positive door se loor operation for Models 680T, 680V, 680W, 681.	al
<u>CK 112</u>	IMPROVED ENTRANCE DOOR LOCKING MECHANISM AND BAYONET	1 September 1970
	rovides an improved entrance door locking mechanism and bayonet release fodel 680FL(P) and a bayonet release assembly for Models 680T, 680V, 680W.	
<u>CK 115</u>	PROPELLER DEICER AMMETER INSTALLATION	3 June 1971
Modification provides an accurate indication of each propeller boot operation and an accurate visual indication that propeller deicer system is operating within designed electrical load limits for Models 680T, 680V, 680W, 681.		
<u>CK 116A</u>	IMPROVED ENGINE OIL SEPARATOR	15 May 1972
Modification provides an improved oil separator for better air oil separation for aircraft equipped with pneumatic operated equipment. Models 500B, 500S, 500U, 560F, 680F, 680FL, 680FL(P), 680F(P) equipped with H-14 Autopilot and/or deicing boots.		
<u>CK 118</u>	LANDING GEAR WARNING HORN SILENCER INSTALLATION	16 February 1973
Allows the pilot to silence the gear warning horn when descending from altitude with the power levers in the flight idle position. Gear warning horn will automatically reset when power levers are advanced or, when flaps are lowered with throttle(s) retarded. Model 690 SN 11003 through 11019.		
<u>CK 119A</u>	BATTERY TEMPERATURE MONITORING SYSTEM	1 June 1973
	al means for monitoring battery temperature, which can be lowered by reducing thereby increasing battery life. Model 690.	
<u>CK 120</u>	DUAL OUTFLOW VALVE INSTALLATION	13 April 1973
Control of both outflow valves, coupled with new nose cone vent, helps minimize pressurization surges. Outflow valves are controlled to close at a rate that insures smooth initial pressurization of cabin for improved passenger comfort. Models 681, 685, 690.		
TW	IN COMMANDER AIRCRAFT LLC • 1176 Telecom Drive • Creedmoor, N	C 27522

Telephone: 919-956-4300 • Fax: 919-682-3786 • www.twincommander.com

<u>CK 121</u>	FUEL VENT CHECK VALVE INSTALLATION	23 May 1973
Prevents aircraft with long-range fuel systems from venting fuel overboard through wing vents during fueling and taxiing. Models 680T, 680V, 680W, 681.		
<u>CK 122</u>	AIR COOLED BATTERY INSTALLATION	21 June 1973
	ans to prevent batteries from overheating and thereby increasing battery life. nd 690 SN 11005, 11008,110118, 11021 and 11022.	
<u>CK 123</u>	IMPROVED NOSE COWL ASSEMBLY	21 August 1973
Modification of nose cowl assembly permitting removal of nose cowl without removing propeller. Improves accessibility for engine maintenance and substantially reduces propeller removal and installation time. Model 685.		
<u>CK 125</u>	POSITIVE DOOR STOP	10 October 74
Provides a positive stop for the cabin entrance door on long fuselage Twin Commanders giving protection for door hinges and fuselage structure. Models 680FL, 680FL(P), 680T, 680V, 680W, 681, 685, 690.		
<u>CK 126</u>	PARALLELING ALTERNATORS	24 July 1975
Installation of Lamar Voltage Regulators provides capabilities for paralleling alternators and better utilization of alternator power. Model 500S.		
<u>CK 127</u>	ENVIRONMENTAL SYSTEM WATER SEPARATOR INSTALLATION	7 July 1976
Provides a water separator for environmental system to prevent moisture from entering cabin area through cabin air outlets. Model 690A.		
<u>CK 128B-2</u>	FIREWALL BLEED AIR SHUTOFF SYSTEM	27 January 2012
Provides firewall shutoff valves for the bleed air system and a system to warn of high temperatures in the aft fuselage (that may be caused by bleed air leaks). Models 690A, 690B.		
<u>CK 129E</u>	INERTIA REEL AND SHOULDER HARNESS INSTALLATION	3 October 2012
Provides inertia reel and shoulder harness for crew seats. Models 500S, 685, 690, 690A, 690B.		
<u>CK 130</u>	<u>NEW ELECTROLUMINESCENT PANEL POWER</u> <u>SUPPLY INSTALLATION</u> Rev 1 Dec 8 2006	4 November 1977
Provides a spares replacement kit for replacing the electroluminescent (E.L.) power supply on Models 690A, 690B.		
	BLEED AIR SYSTEM MODIFICATION Rev 1 Aug 30 2007 n that increases the reliability of the bleed air system by removing the systems ble ve and blocking the direct bleed air path. Model 690A.	31 August 1978 eed

#### CK 132 EXTENDED RANGE FUEL SYSTEM MODIFICATION KIT

Rev 1 July 13 1982

An extended range fuel system modification that increases usable fuel capacity from 425 gallons to 474 gallons for a range increase of approximately 240 nautical miles. Models 690C, 695.

#### CK 133 IMPROVED SIDE WINDOW DEFOG SYSTEM

Modification utilizes conditioned air to prevent pilot and copilot side window from fogging. It also provides pilot and copilot removable inner windows which eliminate cold air on the crew's shoulder. Models 690A, 690B, 690C, 695.

#### CK 134 IMPROVED INLET AIR SUPPLY FOR ENVIRONMENTAL

Provides improved efficiency of Environmental Control Unit (ECU) by ducting only outside air across heat exchanger. Models 690C, 695.

#### CK 135 AURAL MACH OVERSPEED WARNING SYSTEM

Provides a fully automatic airspeed monitoring system, which, because of the low drag feature that allows the Commander jet props to easily increase airspeed during let down, has introduced the added safety feature of an aural warning in the event of an inadvertent overspeed of the airplane. The sensing switch is pre-set to aurally alert the pilot of airspeeds exceeding 243 KIAS. Models 690, 690A, 690B, 690C, 695.

#### IMPROVED TAIL LIGHT/STROBE LIGHT ASSY CK 136

Provides individual strobe light and individual tail light that is more economical to maintain with longer rated bulb life. Models 690B, 690C, 690D, 695, 695A.

#### <u>CK 137</u> WINDSHIELD ANTIFOG SYSTEM

Eliminates internal fogging of windshields and subsequent moisture problems. The gold-tinted heat film also acts as a sunscreen. Models 690, 690A, 690B, 690C, 690D, 695, 695A, 695B.

#### <u>CK 138</u> AUTOMATIC IGNITION SYSTEM

Provides automatic ignition for both engines in case of engine flameout during takeoff and landing on wet runways and during flights in icing conditions. Automatic ignition is not limited to only these conditions; it is available anytime the engine RPM is above 60 percent. Models 690C, 690D, 695, 695A, 695B.

#### AUTOMATIC IGNITION SYSTEM CK 139 9/1/1987 Rev 1

Provides automatic ignition for both engines in case of engine flameout during takeoff and landing on wet runways and during flights in icing conditions. Automatic ignition is not limited to only these conditions; it is available anytime the engine RPM is above 60 percent. Models 680T, 680V, 680W, 681, 690, 690A, 690B.

#### CK 140 HYDRAULIC NOSE STEERING SYSTEM CONVERSION TO 1 March 2011 BRAKE PEDAL ACTUATED Rev B 3/1/2011

Modification to replace your electro-hydraulic nose wheel steering system with a brake-pedal actuated hydraulic nose steering system. Models 690C, 690D, 695A, 695B.

	ATRCHAFT LLC	
<u>CK 141</u>	ENVIRO AIR CONDITIONING AND PRESSURIZATION SYSTEM INSTALLATION	17 July 1992
Provides an al	ternative air conditioning system for Models 690C and 695.	
<u>CK 144C</u>	LOWER SPAR CAP REPLACEMENT	19 June 2012
Provides repla 685, 690, 690	acement of the lower spar cap to restore the structural integrity of the original desig A, and 690B.	n of the Models
<u>CK 145A</u>	LOWER MAIN SPAR REPLACEMENT	20 February 2001
	acement of the lower spar cap to restore the structural integrity of the original desig 580FL, 680FL(P), 680W, and 681.	n of the Models
<u>CK 150</u>	LOWER WING ACCESS HOLE KIT	8 July 1994
Provides approved access hole installation for inspection of lower wing spar (SB 208A) inside of wing between Stringer No. 7 and Stringer No. 8 at Wing Stations 79.00 and 106.36 or for access to gear trunnion fasteners requiring replacement for Models 690, 690A and 690B.		
<u>CK 151B</u>	RECOGNITION LIGHT KIT	28 March 2000
Provides an approved recognition light installation to increase the visibility of the airplane during flight for the Models 500S, s/n 3076 and later, 680W, s/n 1726 thru 1850, 681, 685, 690, 690A, and 690B, all serial numbers. Two kits are availableone with a pulsing function and one without.		
	<u>ADDITION OF INBOARD DEICE BOOTS</u> Rev 1 January 8 2013 pproved installation for the addition of inboard de-ice boots for the Models 690, 690C, and 695.	8 January 1996
<u>CK 159 C</u>	NOSE GEAR AND GEAR SUPPORT MODIFICATIONS	9 October 2013
Provides approved modifications for nose gear and nose gear support structure problems caused by wear, overload conditions, prior AC-43.13 repairs, etc., for all Models.		
<u>CK 161</u>	EXHAUST DUCT MODIFICATION	27 July 1998
Provides an approved modification of the original design exhaust installation for the Models 690, 690A, and 690B.		
<u>CK 162C</u>	LOWER FUSELAGE REPAIR 1	4 December 1999
Provides approved kits for repair of the lower fuselage stringers and lower floor keel beam caps for Models 500, 500A, 500B, 500S, 500U, 520, 560A, 560E, 560F, 680, 680E, 680F, 680FL, 680FLP, 680FLP, 680FLP, 680V, 680W, 681, 685, 690, 690A, 690B, 690C, 695 and 720. Kits may be ordered based on extent of damage.		
<u>CK 163</u>	PPG WINDSHIELD MOISTURE SEAL INSTALLATION AND REPAIR PROCEDURE FOR INSTALLED TWIN COMMANDER WINDSHIELDS	4 August 1998
D 1		

Provides an approved procedure for installed windshields for the addition or repair of hump seals as the primary weather seal between the glass and fiberglass strap for the Models 690, 690A, 690B, 690C, 690D, 695, 695A, and 695B.

F.S. 234.00 - 239.15 FUSELAGE SKIN REPAIR LOWER AFT

Provides an approved repair for skin wrinkles / buckles located between fuselage stations 234.00 and 239.15 aft of the lower aft corner of the baggage door for Models 680T, 680V, 680W, 681, 685, 690, 690A, 690B, 690C, and 695. This kit adds an external skin doubler in the damaged area

CORNER OF BAGGAGE DOOR

TAIL CONE INSTALLATION

Commander aircraft that use the AN5822-1 filter for the vacuum system.

#### TAIL TIE-DOWN BUMPER REPLACEMENT <u>CK 181</u>

Modification designed to repair and replace damage to surrounding skin and attachment structure of the tail tiedown bumper. The modification also improves the attachment of the bumper support to F.S. (429.477 long fuselage) or (355.477 short fuselage) frames. Models 500, 500A, 500B, 500S, 500U, 560, 560A, 560E, 560F, 680, 680E, 680F, 680FL, 680FL(P), 680F(P), 680T, 680V, 680W, 681, 685, 690, 690A, 690B, 690C, 690D, 695, 695A, 695B.

#### CK 182M HID LANDING LIGHT KIT

Provides an approved nose cone mounted landing light installation which increases the visibility of the airplane during landing and have no restrictions regarding when they can be activated during flight. The latest revision includes improved reflector design and replacement ballast. Models 500S, 680W, 681, 685, 690, 690A, 690B.

CK 164

CK 167

		10.14 1 2011	
<u>CK 183F</u>	ENVIRO PRESSURIZATION SYSTEM INSTALLATION	18 March 2011	
Provides an approved, alternative Environmental Control System. Note The -553 kit allows for upgrading an existing ENVIRO installation to the new Temperature & Flow control modules & Flow sensor. For all serial numbers for Models 690C, 690D, 695, 695A, 695B, & also for all serial numbers that have not previously complied with earlier modification to Gulfstream Dwg 880718 (Environmental system installation). For conversion from Sundstrand to Enviro, bleed air only.			
<u>CK 184</u>	RUDDER PEDAL SEAL PLUG INSTALLATION	11 November 2011	
-	dder pedal installation for all serial numbers for Models 680, 680FP, 681, 680T, A 690B, 690C, 695	,	
<u>CK 185</u>	RUDDER PEDAL SEAL PLUG INSTALLATION	11 November 2011	
To provide ru	dder pedal installation for all serial numbers for Models 690D, 695A, 695B		
<u>CK 186</u>	REPLACEMENT OF WELDON FUEL BOOST PUMPS WITH PARKER AIRBORNE FUEL BOOST PUMPS	21 September 2012	
To provide approval and instruction for the replacement of Weldon Fuel Pumps with Parker Airborne Div. Fuel Pumps for Models 690C, 690D, 695, and 695A			
<u>CK 187</u>	MAIN LANDING GEAR LINKAGE KIT	15 August 2012	
This kit provides an approved main landing gear door torque tube mod. This is a design improvement for models 680W, 680T, 680V, 681, 690, 690A/B/C/D, 695, 695A/B.			
<u>CK 188</u>	INSTRUCTIONS FOR INSTALLATION OF OXYGEN BOTTLE FILL PORT	30 November 2012	
This kit provides approval and instruction for the addition of the oxygen fill port for airplanes not equipped with such. For models 690A, 690B, 690C, and 695			
<u>CK 189</u>	CENTER FUEL TANK LINER REUSABLE FASTENER INSTALLATION KIT	10 April 2013	
Rev 1 dated 23 July 2013 Repeated removal and reinstallation of the center fuel cell and liner system leads to damage to the parts and oversized assembly holes. This kit provides approved installation of reusable fasteners for assembly of the fuel cell liner system. For Models: 560A/E/F, 680, 680FL/FL(P)/F(P), 680T/V/W, 720, 681, 685, 690, 690A, 690B, 690C, 690D, 695, 695A, 695B			
<u>CK 190 B</u>	REPLACEMENT OF FLUORESCENT TUBE CABIN LIGHTS WITH LED LIGHTS	20 June 2014	
Replacement of fluorescent overhead cabin lights with low voltage LED (light emitting diode) lights reduces the overall electrical load and eliminates the need for the power supply which converts the 28 VDC of the aircraft to the 120 VAC required by the fluorescent lights. In addition, the life and brightness of the LED lights is significantly greater than that of the fluorescents. For Models: 690A, 690B, 690C, 690C, 690D, 695, 695A, 695B			

<u>CK 191</u>	LEFT SIDE LONG SEAT RAIL INSTALLATION KIT INSTRUCTIONS	13 May 2014	
To provide approval and instruction for long seat rails on the left side for passenger convenience. For Models: 680FL, 680T, 680W, 681, 685, 690, 690A, 690B, 690C, and 695.			
<u>CK 193</u>	410073 Dorsal Water Evacuation System Rev B	21 August 2015	
<b>REASON FOR PUBLICATION:</b> The installed Dorsal does not allow dispersion of moisture that builds up in the cavity between the Dorsal and the fuselage, which leads to corrosion on the fuselage skin under the Dorsal. This kit includes a system of parts to be installed under the Dorsal to provide channels for moisture to drain out of the cavity. Note: Refer to CK196 if a new Dorsal is desired or the existing Dorsal is damaged beyond repair. CK196 installs a dorsal with a built in drainage system, and is effective for models 690A/B. all			
<u>CK 194</u>	Instructions for Installation of improved "Baggage Door Open" Switch	13 January 2015	
To provide approval and instruction for the installation of an alternate switch for "Baggage Door Open" indication. For Models: 690D Serial Numbers 15000 thru 15031, and 695A Serial Numbers 96000 thru 96061.			
<u>CK 195</u>	410014-9 Composite Laminate Dorsal Fin Rev IR	21 April 2015	
<b>REASON FOR PUBLICATION:</b> To replace Dorsal Fin made of plastic with more durable Composite Laminate material and is effective for models 690A/B. all			
<u>CK 196</u>	410073-25 Composite Laminate Dorsal Shell with Moisture Dispersion System Rev IR	22 April 2015	
<b>REASON FOR PUBLICATION:</b> The Dorsal of the original design (P/N 430073-1/-501/-503/-505/-507) does not allow dispersion of moisture that builds up in the cavity between the Dorsal and the Fuselage, which leads to corrosion on the fuselage skin under the Dorsal. This kit includes a Dorsal that provides channels for moisture to drain out of the cavity and is effective for models 690A/B. all			
<u>CK 197</u>	Beta Pressure Switch System Modification Rev IR	11 June 2015	
<b>REASON FOR PUBLICATION:</b> This Custom Kit provides an approved modification to the Beta Pressure System. The addition of a restrictor before the Beta Pressure Switch will dampen pressure fluctuations in the system, eliminating the Beta pressure Indictor Light to flicker in flight and is effective for all 690, 690A, and 690B models.			
<u>CK 198</u>	410080 Dorsal Water Evacuation System Rev IR	30 October 2015	
<b>REASON FOR PUBLICATION:</b> The installed Dorsal does not allow dispersion of moisture that builds up in the cavity between the Dorsal and the fuselage, which leads to corrosion on the fuselage skin under the Dorsal. This kit includes a system of parts to be installed under the Dorsal to provide channels for moisture to drain out of the cavity. Models 690C/D, 695, 695A/B all			

all.

07 April 2020

<u>CK 200</u>	410080 Composite Laminate Dorsal Shell With Moisture Dispersion System Rev IR	6 November 2015
<b>REASON FOR PUBLICATION:</b> The Dorsal of the original design (410080-3, -1 installation does not allow dispersion of moisture that builds up in the cavity between the Dorsal and the fuselage, which leads to corrosion on the fuselage under the Dorsal. This kit includes a replacement Dorsal that provides channels for moisture to drain out of the cavity, and is for replacement of a previously installed 410080 Dorsal. Models 690C/D, 695, 695A all.		
<u>CK 202</u>	Instructions for Installation of Improved Remotely Controlled Circuit Breakers Rev A	12 April 2016
<b>REASON FOR PUBLICATION:</b> To provide approval and instruction for the installation of an alternate Remotely Controlled Circuit Breaker Models: 690A, 690B		
<u>CK 203</u>	Instructions for Rudder and Elevator Trim Potentiometer Replacement	20 April 2016
<b>REASON FOR PUBLICATION:</b> This kit provides instructions for replacement of 850626-503 and 850633-503 Transmitters Models 690C/D, 695, 695A 695B all.		
<u>CK 204</u>	Landing Gear Warning Horn Installation	10 June 2019
<b>REASON FOR PUBLICATION:</b> This kit provides instructions for replacement of 53514-3 and 53534-103 Horns, which are no longer available. Models 500S: 3155 thru 3323, 685: 12028 thru 12066, 690: 11070 thru 11085, 690A: 11248, 11250 thru 11268.		

CK205 NLG Steering Spacer Installation

### **REASON FOR PUBLICATION:**

This kit provides instructions for replacement of the 750080-1 & ES10119 spacer, which is a two piece unit. Models 560: 191-230, 560A/E/F, 500A/B/U/S, 680E/F/FP/FL/FL/FL/P/T/V/W, 681, 685, 690A/B/C/D, 695A/B.
